

The background of the entire page is a blurred, high-angle photograph of a workspace. It features a silver laptop in the upper half, a lined notebook in the lower-left, and a dark smartphone in the lower-right. The text is overlaid on this background.

Tapfer Technologies UK Ltd

Introducing our
Blockchain
Development Services

WWW.TAPFER.CO.UK

WHAT WE OFFER

R&D as a Service

Let the experts do it!
We know how to start, where to look and what to implement.
Outsource your Research & Development to us - save costs and get a quick outcome.

Data Services

Be it Data audit, immutability or warehousing - we have you covered. We are also experts in providing proof of data as inputs to systems.

End-To-End Solutions

From issuing a bank account to recording an Apple pay transaction on the Blockchain: we can provide end-to-end pilots and implementations.

Smart Contracts

Record it on a Public Blockchain! Smart Contracts are the basic units of programming on Blockchains. We cover any and all scenarios.

Our Forte

Being one of the first adopters of Blockchain Technology, we have a strong and solid footing in the field. We have apps, contracts and complete Blockchains working in the wild that we have developed and maintain. At Tapfer Technologies, we strive for excellence and innovation. Our clients come to us because we can do what others cannot. Imagine the impossible is now possible!

Whom do we work with:

- Governments
- Corporations
- Blockchain Projects

Our Notable achievements: In a short span of time, we have had the opportunity to work on the following projects. Please ask us for further information and demos:

- Working with a US state department for their digitisation needs over the Blockchain.
- Digitising official documents for an African country over the Blockchain.
- Production of an end-to-end evolutionary distributed app for a Blockchain-based client.

What else do we do:

- Internet of Things
- Access management systems
- Wifi & Wireless Technologies

01

YOUR BLOCKCHAIN

WE DEVELOP BLOCKCHAINS !

From Forks to network tuning and developing new proofs of data to be transacted - you can rely on us to implement and/or replicate your own Blockchain project.

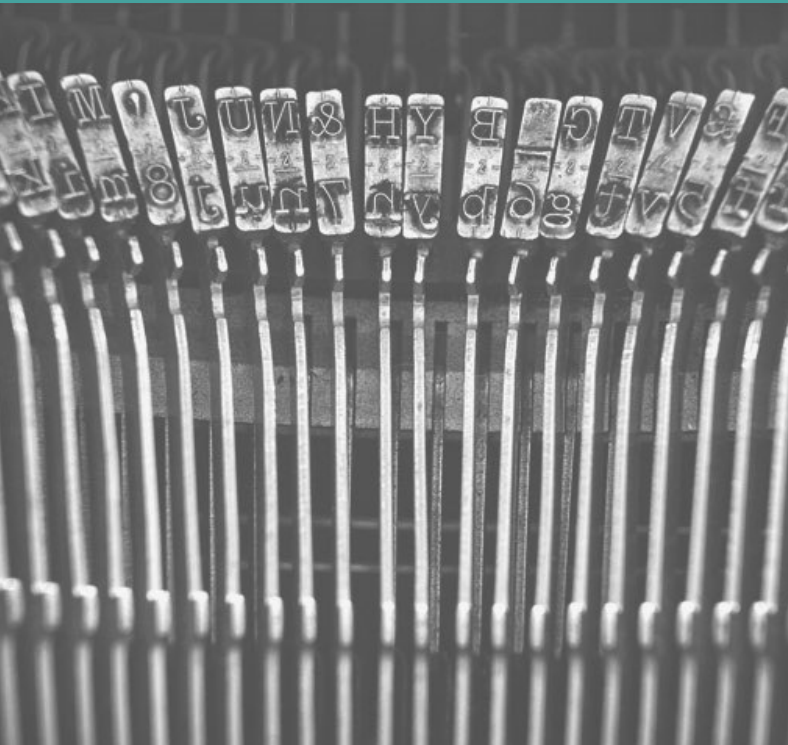

02

BLOCKCHAIN SOFTWARE

VERSATILE SOLUTIONS ON EXISTING NETWORKS

We provide custom software development services over Ethereum, NEO and Hyperledger Blockchains.

03

ECIES: THE STRONGEST FORM OF ENCRYPTION

The best encryption scheme known to mankind!

Elliptic Curve Integrated Encryption Scheme

We have mastered and implemented the strongest form of Encryption available in the modern world. This is a top-of-the-line encryption scheme wherein once encryption is complete, even the encryptor can't decrypt without the other party's credentials.

This form of encryption is only being used by a select few, very large, IT corporations and even the NSA uses a lower form of encryption than ECIES.

BLOCKCHAIN SOLUTIONS FOR YOUR BUSINESS GOALS

Tailor-made services focused to solve YOUR business needs

Whether you are an IT business, a financial institution or a trading firm - we have the skills and the capabilities to deliver a complete, working piece of software on the Blockchain for you. The solutions we make are directed towards one goal: YOUR requirements.

Get in contact with us today to see how you can move to the Blockchain!

OUR CLIENTS LOVE US BECAUSE WE FOCUS ON THEIR BUSINESS NEEDS. AND WE ALWAYS DELIVER!

Our group of companies has a proven 10 year record of working as agency to Governments and corporates. We truly understand that one size does not fit all. We plan, execute and support a project according to the needs of our clients.

Our group of companies has served as agencies to household names like Metro Cash & Carry, Dominos Pizza, Pepsi and Standard Chartered Bank to name a few. Our happy clients will vouch for our focus, quick delivery and solutions that work for them.

Demos Available on Request.

We pride ourselves on delivering a final, working product that has a real-world impact for our clients. We provide consultancy and research facilities so that you can get started today with this new form of disruptive technology.

Whatever your business needs and no matter how complex your business scenario may be, it can benefit from introducing Blockchain technologies. And we are here to guide you through the process and deliver a product that you want. The idea in your mind - think it possible!
